PERMIT REVISION DATE: N/A  
REPORT WRITTEN BY: Michael Zabrecky

FACILITIES INSPECTED: Cargo Loading & Unloading Operation

PERSON(S) INTERVIEWED: Adam Virosztko, Operations Manager

INSPECTION OBJECTIVE(s):

To perform an unannounced inspection to evaluate Savage Services Corporation's compliance with applicable air pollution regulations specified in their local operation permit.

SUMMARY OF INSPECTION:

On September 19, 2016, an Annual Inspection was conducted. This facility holds one (1) operation permit for a Cargo Loading & Unloading Operation.

A fuel additive was being unloaded from a railcar to a tanker truck. The Kewanee Boiler was also in operation at the time of inspection.

No violations or visible emissions observed.

### ENTRY INTERVIEW:

Upon entry, I met with Mr. Adam Virosztko, Operations Manager for Savage Services Corporation. I informed him that this is an Annual Inspection, and that I wanted to inspect the locally permitted items.

### INSPECTION OBSERVATION(s):

1. Process Equipment: Cargo Loading & Unloading Operation  
One (1) natural gas-fired Kewanee Boiler  
One (1) portable chain conveyor and dust collector  
One (1) liquid unloading process
2. Process Description:  
One (1) natural gas-fired Kewanee Boiler with a maximum heat input capacity of 8.4 MMBtu/hr.  
  
One (1) portable chain conveyor, with a maximum transfer rate from railcar to truck of twenty-five (25) tons per hour of granular or powdered product, using a dust collector.  
  
One (1) liquid unloading process, with a maximum transfer rate from railcar to truck of 9710 gallons per hour.
3. Pollutants Emitted:  
Products of combustion (POC), particulate matter (PM), and volatile organic compounds (VOC)
4. Control Equipment:  
Dust collector
5. Applicable Rules:  
The provisions of 326 IAC Article 2, and Hammond Ordinances #7102 and #3522 (as Amended)
6. Emission Limitations:  
POC = natural gas only  
PM = 0.03 grains per dry standard cubic foot.  
VOC = 0.32 lbs per 1000 gallons transferred and less than 10 tons per year.
7. Other Permit Requirements:  
See the General and Special Operation Permit Conditions for 2016.
8. Observations:  
There was fuel additive (Nemo 1125) being transferred from a railcar to a tanker truck. No visible emissions observed. No modifications of the permit found.  
The Kewanee Boiler was also in operation. No visible emissions or

modifications observed.

9. Records Review:

No records review is required.

10. Compliance Status:

No violations observed or determined during the plant inspection.

**CONCLUSION(s)/RECOMMENDATION(s):**

The entire facility was inspected. No violations, visible emissions, or new sources of air emissions were observed.
